

## Return form

Legal regulations for the protection of the environment and our personnel require that returned sensors that have come into contact with liquids and gases can be handled without risk to personnel and the environment.

**The repair/analysis can be carried out quickly and without queries if:**

- o the present form is filled in for each sensor
- o the sensor is free of hazardous substances and packaging is used which prevents damage to the device
- o a safety data sheet of the measuring medium is attached to the outside of the packaging in case the device has come into contact with a critical substance.
